

Login to automate mood tracking

Don't know what *music* to *listen* to?
Click a photo, *upload* it below!
And find a *playlist* that fits your *mood*

Upload Photo

What are you currently feeling? 😊

About

We know your heart! We use face recognition to detect the emotion you are currently feeling: happy, sad, angry or surprised.

For each mood we have curated a Spotify playlist with songs that match the mood you are in. We have included top hits as well as hidden gems in our playlists.

We help you save time by eliminating the need to spend hours searching for the perfect songs that match your mood! With our Mood Log you can even keep track of the moods you have been in lately.
